## The Future is Now presentation with Bob McDonald

September 25th 1:00 pm

Free to members - this is sponsored by Oxford, Norfolk, Halton, Sault Ste Marie, Brant

There is no shortage of energy on Earth. It falls out of the sky, blows on the wind, bubbles out of the ground, it literally grows on trees. And the good news is that the technology to gather it up already exists. This presentation is an update on the latest in clean energy technologies that will bring us into a new green industrial revolution. We will also see how beating the Covid pandemic provided a model of how science, technology, government support and public buy-in can solve an invisible threat to humanity. We can do it again with climate change.
